

1

Register (optional)

POST /auth/register — create a new account if needed.

2

Login

POST /auth/login — saves `{{token}}` automatically via the Tests script above.

3

Create Trajet

POST /trajets — copy the returned `id` into `trajet_id`.

4

Create Reservation

POST /reservations — uses `trajet_id`. Save returned `id` into `reservation_id`.

5

Accept or Refuse

PATCH /reservations/`{{reservation_id}}`/accept — run as the trajet owner.

6

Create Avis

POST /avis — rate the conducteur after a completed trip.

7

Create Ligne (admin)

POST /lignes — admin token required. Save `id` into `ligne_id`.

8

Create Arret (admin)

POST /arrets — requires `ligne_id` to be set.

9

Create Horaire (admin)

POST /horaires — requires `ligne_id` to be set.

10

Create Incident

POST /incidents — any authenticated user can report.

11

Resolve Incident (admin)

PATCH /incidents/`{{incident_id}}`/resolve — admin token required.

API Reference

 = requires Authorization header • (admin) = admin role token required
